 etc., successfully taught by mail or no charge. POSITIONS secured. 10,000 students. Booklet free. Add. DEPT. G L. DRAUGHON'S BUS. COL. Ft. Worth, Tex.

Attend School Cheaper by entering through wires. American School & College Agency, Chicago.

HAMLIN'S WIZARD OIL FOR SORES, ULCERS

ALL DRUGGISTS SELL IT

PLEASING RESULTS

always follow the use of Newbro's Herpicide, the new scientific cure for dandruff and falling hair. It possesses certain properties that kill the germ or microbe that causes all the trouble by sapping the oil out of the hair bulb. With this parasite destroyed, dandruff and the falling hair cannot exist. A thick, soft growth of hair springs forth where formerly thin, brittle hair, or perhaps total baldness held sway. One bottle will convince you of its merits.

For Sale at all First-Class Drug Stores.

RAIN CAN'T TOUCH
 the man who wears **SAWYER'S EXCELSIOR BRAND Suits and Slickers**
 Warranted waterproof. Made to stand, but with rough weather. Look for trade mark. If your dealer doesn't have them, send for catalogue to H. M. SAWYER & SON, Sole Mfrs., East Cambridge, Mass.

DR. MOFFETT'S TEETHINA (TEETHING POWDERS)
 Costs Only 25 cents at Druggists, or mail 25 cents to C. J. MOFFETT, M. D., ST. LOUIS, MO.
 We have handled Dr. Moffett's TEETHINA (Teething Powders) ever since its first introduction to the public and trade as a proprietary medicine, and our trade in it has steadily increased from year to year until our orders now amount to two or three hundred gross per year, which is a very strong evidence of its merit and the satisfaction it is giving to the mothers of the country, for they say nothing so effectively counteracts the effects of the summer's hot sun or overcomes so quickly the troubles incident to teething.

BACO-CURO
 money refunded. At all good Druggists or direct from us. Write for free booklet.
EUREKA CHEMICAL CO., - La Crosse, Wis.

ST. MARY'S SEMINARY, LA PORTE, TEXAS.

Select Boarding School for Young Men and Boys. Specially supervised by Bishop of Galveston and directed by Fathers of St. Basil. COURSE: Theological, Academic, Commercial and Preparatory. Healthful situation on high mainland, overlooking and adjoining the Bay. Apply

Very Rev. President.

Every stranger who enters the White House at Washington is counted by an automatic register. The instrument is held in the hand of one of the watchmen stationed at the door, and for every visitor he pushes the button. Congressmen, senators, members of the cabinet and newspaper men are not counted.

WHEN YOUR GROCER SAYS

he does not have DeLancey Starch, you may be sure he is afraid to keep it until his stock of 12 oz. packages are sold. DeLancey Starch is not only better than any other Cold Water Starch, but contains 16 oz. to the package and sells for same money as 12 oz. brands.

An American railway engineer who has just been placed on the pension list has one of the most remarkable records of any locomotive engineer in the world. For forty-two consecutive years he has kept an account of the miles he has traveled. The total amounts to 1,402,297 miles.

DeLancey Starch is guaranteed biggest and best or money refunded. 16 ounces, 10 cents. Try it now.

After the recent death in Vienna of an actress named Louise Mayhofer, her papers were examined, when it was discovered that she was a daughter of de la Motte Fouque. She was born at Paris in 1822.

Ladies Can Wear Shoes

One size smaller after using Allen's Foot-Ease, a powder. It makes tight or new shoes easy. Cures swollen, hot, sweating, aching feet, ingrowing nails, corns and bunions. All druggists and shoe stores, 25c. Trial package FREE by mail. Address Allen S. Olmsted, Lefroy, N. Y.

Mrs. Clarence H. Mackay, the eastern society leader, only uses violet stationery, and because the red 2-cent stamp is of inharmonious tint she only uses the 3-cent variety.

Chauncey Depew's son "Buster" intends to study for the medical profession and his father has been consulting some famous French doctors about the matter. The young man will probably be given a private laboratory in the Pasteur Institute, Paris.

Two hundred native beaters are being brought from eastern Bengal to assist at the elephant hunt in Mysore, which is being arranged for Lord Curzon, on the occasion of the installation of the young maharajah in August.

Mail's Catarrh Cure
 Is taken internally. Price, 75c.

ment of Egyptian musical instruments. It is found represented in monuments antedating the date of Christ by 2,000 years. It consists of a circular body, with a large triangular frame above, from the cross-bar of which five strings pass to the bottom of the frame.

The immigrants arriving now have a low rate of illiteracy. Last year 62 per cent of the adult Syrians who landed at the port of New York could neither read nor write. The rate of illiteracy among Southern Italians was 55 per cent, and among the Greek immigrants 21 per cent. Among the Polish immigrants it was 31.

Piso's Cure is the best medicine we ever used for all affections of the throat and lungs.—Wm. Q. ESDELEY, Vancouver, Ind., Feb. 10, 1900.

Although 125 years old a watch owned by a gentleman in Gloucestershire, Eng., still keeps excellent time. It was worn at Trafalgar, during the Peninsular war, at Waterloo, through the China war in 1840, and finally in the Indian mutiny.

Smuggled tobacco confiscated by the British customs authorities was formerly burned in the huge furnace known as the Queen's Pile, but for some years past this has not been done. Instead, the tobacco is sent to the criminal lunatic asylums for the benefit of the inmates.

Cures Cholera-Infantum, Diarrhoea, Dysentery, and the Bowel Troubles of Children of Any Age.
 Aids Digestion, Regulates the Bowels, Strengthens the Child and Makes TEETHING EASY.

Feeding Farm Horses.

Prof. C. W. Burkett of the New Hampshire experiment station has been conducting some experiments in the feeding of horses. The investigation included the amount of water consumed, the cost of feeding and the method of feeding. The trials extended over two years. The amount of water consumed was recorded in all the tests. Both the ration consumed and the amount of work performed influence the quantity of water drunk by workhorses, although the individuality of the horse has the most marked effect. In the present investigation the quantity of water varied from 25,895 pounds to 35,997 pounds per year. Following are the principal conclusions drawn by the author:

Any food stuff or combination of foodstuffs furnishing the desirable nutrient at least cost should be considered in preparing rations for horses.

A mixture of bran and corn, half and half, is a good substitute for corn and oats for feeding work horses.

Corn stover is a good substitute for timothy hay for winter feeding of horses because of its feeding value, the yield per acre, and commercial value.

A change from a grain mixture, consisting partially of linseed-oil meal, slowly or abruptly, does not cause a decrease in weight in horses if a proper substitute ration is fed.

The average cost per year for actual food supply per horse was \$74.32.

The average cost for feed per hour's work done during two years was 2.4 cents.

Feeding Stock in Idaho.

From Farmers' Review: The condition of ranges here is good this year. They consist of bunch grass, brance, and a short grass that comes in the spring and sometimes in the fall, if we have the rains to start it. All the ranges that lie next to the valleys are pretty well fed off for from ten to fifteen miles north and northeast. From that on the range increases in goodness for 100 miles or more. It is stocked with cattle, horses and sheep—more sheep than any other stock, which are owned in flocks of 3,000 to 20,000. Staked up into bands containing 100 to 200 head.

then a camp tender looks after the wants of the several bands. As a general thing stock are taken from the feed yards in March to the ranges and brought back in November or December to the feed yards, where hay can be bought for \$4 to \$5 per ton in one-hundred-ton lots. Horses winter on the ranges without any feeding almost every season, and so do cattle in some places. The horses consist of common range stock. Some good cattle are being brought and lots of blooded sheep are being placed on the range. We have a good wool market and that, like our beef and mutton, is shipped either east or west, but our horses generally go east. The blooded stock are more tender than native animals and need more care, but they bring a better price.—Jason Hallock, Washington County, Idaho.

Benefit of Grinding Grain.

Twenty head of young grade calves were purchased by the Kansas Experiment station during April and May, 1901. The feed of these calves was gradually changed to skim milk, with what grain they would eat, composed of a mixture of whole and ground Kaffir corn. On June 19, these calves were divided into two lots, as nearly equal as possible, the lot to receive ground Kaffir corn weighing 1,570 pounds, or 157 pounds per calf, and the one to receive whole Kaffir corn weighed 1,677 pounds, or 167.7 pounds per head. Each lot was fed all the skim milk, grain and hay the calves would eat without scouring.

Ground Kaffir Corn Lot.—For the 112 days under experiment, these ten calves consumed 14,748 pounds of skim milk, 1,394 pounds of ground Kaffir corn, 2,381 pounds of prairie hay, 125 pounds orchard grass hay, and 6,222 pounds alfalfa hay. The total gain of the lot during the experiment was 1,580 pounds, or 1.41 pounds daily per calf. With skim milk at 15 cents per hundred weight, grain at 50 cents per hundred weight (plus 3 cents per bushel or 6 cents per hundred weight for grinding), and hay at \$4 per ton, the feed cost of raising these calves amounts to \$47.37, or \$4.73 per head. The cost per hundred pounds of gain is as follows: Skim milk, \$1.40; grain, \$0.49; roughness, \$1.10; total, \$2.99.

Where the climate is cold and vegetation scanty, the wild horses are dwarfed in size, active and hardy, with compact bodies and long hair.

When people are in love they will not believe anything they hear and a little later they believe everything.

Renovated Butter.

Renovated butter is now a subject of national inspection, though it has not been placed under as rigid rules as has oleomargarine. The license that must be paid by the manufacturers of renovated butter is but \$50 per year, and nothing at all is required of the retailers. The factories, however, are subject to regulations that make it impossible for the manufacture of butter and the renovation of butter to be carried on in the same place. Thus a renovated butter establishment must be entirely separated from anything else. If butter is made under the same roof, the part of the establishment in which butter is renovated must be separated from the other by a lead wall, a wall having no openings of any kind. No doors are allowable. The manufacturer of renovated butter is compelled to give a bond of \$5,000 guaranteeing that he will comply with the laws in the management of his factory. Moreover every package of butter that goes out of the factory must bear a notice to the effect that the manufacturer has complied with the law. Unless he files the bond as specified no license is granted. Every package of renovated butter must bear a revenue stamp. In the top of every package of butter must be impressed the words "Renovated Butter," and if the butter is made into prints each print must bear these words. The factory can ship out no package containing less than ten pounds, but the package may contain any number of prints. When on sale these prints must be kept in the original package till disposed of. The manufacturers of renovated butter are compelled to lay their books open to the inspection of government officials and they must account for every pound of material coming in and going out of the factory.

Cause of Failure With Sugar Beets.

The raising of sugar beets is not an easy task, especially to the western farmer. The eastern farmer is accustomed to hood crops and to giving intensive culture, but the western farmer has been in the habit for a generation past of raising crops that about take care of themselves, at least till harvest time. For him to attempt to raise a crop of anything but a hardy crop requires constant attention and the keeping down of weeds is a little out of his line. Sugar beets demand a great deal of labor and prompt attention. It does not do to neglect them for some weeks, while cheap help is being waited for. Not only must the weeds be kept down, but the beets themselves must be thinned as soon as they reach the size demanding it. This is a task of good proportions when the beets cover a ten-acre field or larger. Labor pays well when used in growing this crop, but it cannot be stinted. That such labor is difficult to get just when the beets need it most all farmers know. The heat of summer and the rains make the weeds grow with surprising rapidity, and it is at this time that labor is employed in other things about the farm. If there come several days of rains that make it difficult to get onto the land so much the worse for the labor problem.

Protect Orchard Soil.

In a discussion on orcharding H. Augustine said: I noticed particularly in the Missouri state meeting that there is a general feeling that the soil is being injured by exposure to the hot sun during the summer. I am talking now of an orchard that is not covered all over and shaded all over. They think that the soil is being injured by the constant exposure from year to year to the hot season, especially in central Illinois, where we have this black soil, where the sun's rays are terrible, and over in Missouri they feel that they must do something occasionally once in two or three years at least they must seed it down to clover or something else, to prevent the bare ground being exposed to the action of the hot sun, and that has been my impression. I do not believe in leaving the weeds to grow and ripen, but the weeds are naturally there, and sometimes you can't get a stand of clover or anything else, so as to have the ground protected for a year, but if you have the weeds and mow them just as soon as they get to be of some size and keep on at that, you are obtaining a mulch to retain the moisture, a great deal more than it evaporates, in my way of thinking.

Well-behaved club waiters are frequently called to order.

Religion without joy is a sun without light.

No one is nearer heaven by belonging to the upper classes of society.

TO YOUNG LADIES.

From the Treasurer of the Young People's Christian Temperance Association, Elizabeth Caine, Fond du Lac, Wis.

"DEAR MRS. PINKHAM:—I want to tell you and all the young ladies of the country, how grateful I am to you for all the benefits I have received from using Lydia E. Pinkham's Vegetable Compound. I suffered for

MISS ELIZABETH CAINE

eight months from suppressed menstruation, and it effected my entire system until I became weak and debilitated, and at times felt that I had a hundred aches in as many places. I only used the Compound for a few weeks, but it wrought a change in me which I felt from the very beginning. I have been very regular since, have no pains, and find that my entire body is as if it was renewed. I gladly recommend Lydia E. Pinkham's Vegetable Compound to everybody."

MISS ELIZABETH CAINE, 69 W. Division St., Fond du Lac, Wis.—\$5000 forfeit if above testimonial is not genuine.

At such a time the greatest aid to nature is Lydia E. Pinkham's Vegetable Compound. It prepares the young system for the coming change, and is the surest reliance for woman's ills of every nature.

Mrs. Pinkham invites all young women who are ill to write her for free advice. Address Lynn, Mass.
